PROGRAM MYFIDELE – *'BECAUSE YOU MATTER TO US'*

Untuk memastikan kesetiaan pelanggan terhadap produk dan perkhidmatan syarikat bukanlah sesuatu yang mudah. Maksud kesetiaan pelanggan adalah kesediaan syarikat untuk terus berusaha dalam memastikan produk atau perkhidmatan yang ditawarkan masih bersesuaian dan relevan dengan kehendak pelanggan. Bukan itu sahaja syarikat perlu memastikan hubungan dengan pelanggan sentiasa baik dan berterusan iaitu melalui pembelian yang berterusan daripada pelanggan terhadap produk dan perkhidmatan syarikat tersebut dan sehingga berlakunya proses percambahan di mana pelanggan sanggup membuat cadangan produk atau perkhidmatan tersebut kepada keluarga mahupun rakan-rakan mereka.

Oleh itu, dalam usaha untuk memastikan kesetiaan pelanggan sedia ada, MYNIC telah melancarkan satu program khas untuk para pelanggan MYNIC iaitu myFidele - dengan slogan *Because You Matter To Us*. 'Fidele' yang bermaksud 'setia' dalam bahasa Perancis dan program ini direka bagi menghargai para pelanggan MYNIC di atas kesetiaan dan sokongan terhadap produk dan perkhidmatan MYNIC. Konsep program ini adalah menang melalui kesetiaan atau *Winning Through Loyalty* yang membolehkan para pelanggan menerima ganjaran apabila memperbaharui nama domain .my.

Program myFidele diadakan sebanyak dua pusingan setiap tahun yang mana ia memperkenalkan tiga kategori dalam menghargai pelanggan mereka iaitu myFidele *Surprise*, myFidele *Gold* dan myFidele *Rewards*. Kategori *myFidele Gold* mensasarkan kepada pelanggan yang telah bersama-sama dengan MYNIC lebih dari sepuluh tahun. Manakala kategori *myFidele Rewards* pula adalah rebat yang diberikan kepada pelanggan yang mempunyai lebih daripada 20 nama domain dan mereka memperbaharui semua nama domain tersebut.

(b) **Basis of measurement**

The financial statements have been prepared on the historical cost basis other than as disclosed in Note 4.

(c) **Functional and presentation currency**

The financial statements are presented in Ringgit Malaysia (RM), which is the Group's functional currency, unless otherwise stated.

(d) **Use of estimates and judgements**

The preparation of the financial statements in conformity with MFRSs requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

There are no significant areas of estimation uncertainty and critical judgements in applying accounting policies that have significant effect on the amounts recognised in the financial statements.

3. DATE OF AUTHORISATION OF ISSUE

The financial statements were authorised for issue by the Board of Directors on 03 MAR 2016

4. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to the periods presented in these financial statements, and have been consistently by the Group entities, unless otherwise stated.

(a) Basis of consolidation

(i) Subsidiaries

Subsidiaries are entities, including unincorporated entities, controlled by the Company. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. Control exists when the Group has the ability to exercise its power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

In assessing control, potential voting rights that presently are exercisable are taken into account.

Investments in subsidiaries are measured in the Company's statement of financial position at cost less any impairment losses, unless the investment is held for sale or distribution. The cost of investments includes transaction costs.

The accounting policies of subsidiaries are changed when necessary to align them with the policies adopted by the Group.

(ii) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

Unrealised gains arising from transactions with associates and joint ventures are eliminated against the investment to the extent of the Group's interest in the associates. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

(b) Financial instruments

(i) Initial recognition and measurement

A financial instrument is recognised in the financial statements when, and only when, the Group or the Company becomes a party to the contractual provisions of the instrument.

A financial instrument is recognised initially, at its fair value plus, in the case of a financial instrument not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial instrument.

(ii) **Financial instrument categories and subsequent measurement**

The Group and the Company categorise financial instruments as follows:

Financial assets

(a) **Financial assets at fair value through profit or loss**

Fair value through profit or loss category comprises financial assets that are held for trading, including derivatives (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument) or financial assets that are specifically designated into this category upon initial recognition.

Derivatives that are linked to and must be settled by delivery of unquoted equity instruments whose fair values cannot be reliably measured are measured at cost.

Other financial assets categorised as fair value through profit or loss are subsequently measured at their fair values with the gain or loss recognised in profit or loss.

(b) **Held-to-maturity investments**

Held-to-maturity investments category comprises of debt instruments that are quoted in an active market and the Group or the Company has the positive intention and ability to hold them to maturity.

Financial assets categorised as held-to-maturity investments are subsequently measured at amortised cost using the effective profit rate method.

(c) **Loans and receivables**

Loans and receivables category comprises of debt instruments that are not quoted in an active market.

Financial assets categorised as loans and receivables are subsequently measured at amortised cost using the effective profit rate method.

(d) **Available-for-sale financial assets**

Available-for-sale category comprises of investment in equity and debt securities instruments that are not held for trading.

Investment in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at cost. Other financial assets categorised as available-for-sale are subsequently measured at their fair values with the gain or loss recognised in other comprehensive income, except for impairment losses, foreign exchange gains or losses arising from monetary items and gains and losses of hedged items attributable to hedge risks of fair values hedges which are recognised in profit or loss. On derecognition, the cumulative gain or loss recognised in other comprehensive income is reclassified from equity into profit or loss. Profit calculated for a debt instrument using the effective profit rate method is recognised in profit or loss.

All financial assets, except for those measured at fair value through profit or loss, are subject to review for impairment in accordance with Note 4(f)(i).

Financial liabilities

All financial liabilities are subsequently measured at amortised cost other than those categorised as fair value through profit or loss.

Fair value through profit or loss category comprises financial liabilities that are derivatives (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument) or financial liabilities that are specifically designated into this category upon initial recognition.

Derivatives that are linked to and must be settled by delivery of unquoted equity instruments whose fair values cannot be reliably measured are measured at cost.

Other financial liabilities categorised as fair value through profit or loss are subsequently measured at their fair values with the gain or loss recognised in profit or loss.

(iii) **Derecognition**

A financial asset or part of it is derecognised when, and only when the contractual rights to the cash flows from the financial asset expire or the financial asset is transferred to another party without retaining control or substantially all risks and rewards of the asset. On derecognition of a financial asset, the difference between the carrying amount and the sum of the consideration received (including any new asset obtained less any new liability assumed) and any cumulative gain or loss that had been recognised in equity is recognised in the profit or loss.

A financial liability or a part of it is derecognised when, and only when, the obligation specified in the contract is discharged or cancelled or expires. On derecognition of a financial liability, the difference between the carrying amount of the financial liability extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in the profit or loss.

(c) **Property, plant and equipment**

(i) **Recognition and measurement**

Items of property, plant and equipment are stated at cost less any accumulated depreciation and any accumulated impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset and any other costs directly attributable to bringing the asset to working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. The cost of self-constructed assets also includes the cost of materials and direct labour. For qualifying assets, borrowing costs are capitalised in accordance with the accounting policy on borrowing costs.

Cost also may include transfers from equity of any gain or loss on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

The cost of property, plant and equipment recognised as a result of a business combination is based on a fair value at acquisition date. The fair value of property is the estimated amount for which a property could be exchanged between knowledgeable wiling parties in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion.

The fair value of other items of plant and equipment is based on the quoted market prices for similar items when available and replacement cost when appropriate.

When significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

The gain or loss on disposal of an item of property, plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment and is recognised net within "other income" and "other expenses" respectively in profit or loss.

(ii) **Subsequent costs**

The cost of a component part of an item or property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the component will flow to the Group or the Company, and its cost can be measured reliably. The carrying amount of the replaced component is derecognised to profit or loss. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

(iii) **Depreciation**

Depreciation is based on the cost of an asset, or other amount substituted for cost, less its residual value. Significant components of individual assets are assessed, and if a component has a useful life that is different from the remainder of that asset, then that component is depreciated separately.

Depreciation is recognised in profit or loss on a straight line basis over the estimated useful lives of each component of an item of property, plant and equipment. Property, plant and equipment under construction are not depreciated until the assets are ready for their intended use. The estimated useful lives are at the following rates:

IT equipments	20 - 33 1/3%
Furniture and fittings	10%
Motor vehicles	10%
Office equipment	20%
Renovation and improvement	10%

Depreciation methods, useful lives and residual value are reviewed and adjusted as appropriate at end of the reporting period.

(d) **Intangible asset**

(i) **Other intangible assets**

Intangible assets, other than goodwill, that are acquired by the Group, which have finite useful lives are measured at cost less any accumulated amortisation and any accumulated impairment losses.

(ii) **Subsequent expenditure**

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss as incurred.

(iii) **Amortisation**

Amortisation is based on the cost of an asset less its residual value.

Goodwill and intangible assets with indefinite useful lives are not amortised but are tested for impairment annually and whenever there is an indication that they may be impaired.

Other intangible assets are amortised from the date that they are available for use.

Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets from the date that they are available for use.

The estimated useful lives for the current and comparative periods are as follows:

- Patents and trademarks 10 years

Amortisation methods, useful lives and residual values are reviewed at the end of each reporting period and adjusted, if appropriate.

(e) **Cash and cash equivalents**

Cash and cash equivalents consist of cash in hand, bank balances and deposits with banks and highly liquid investments which have an insignificant risk of changes in value with original maturities of three months or less. For the purpose of the statement of cash flows, cash and cash equivalents are presented net of bank overdrafts and pledged deposits.

Cash and cash equivalents are categorised and measured as loans and receivables in accordance with policy Note 4(b)(ii).

(f) **Impairment**

(i) **Financial assets**

An impairment loss in respect of loans and receivables is recognised in profit or loss and is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account.

(ii) **Other assets**

The carrying amounts on other assets are reviewed at the end of each reporting period to determine whether there is any indication of impairment. If any such indication exists, than the asset's recoverable amount is estimated.

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash flows of other assets or groups of asset (the "cash-generating unit").

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount.

Impairment losses are recognised in the profit or loss. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (groups of units) on a *pro rata* basis.

Impairment losses recognised in prior periods are assessed at the end of each reporting period for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognised.

An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised. Reversals of impairment losses are credited to profit or loss in the year in which the reversals are recognised.

(g) **Other investments**

Other investment is stated at cost less provision for diminution in value of investment to recognise any decline, other than a temporary decline, in the value of the investments.

(h) **Provisions**

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of a time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

(i) **Revenue**

(i) **Services**

Revenue represents the invoiced value of services rendered after allowance for commission paid to agents.

(ii) **Government grants**

Government grants are recognised initially as deferred income at fair value when there is reasonable assurance that they will be received and the Group will comply with the conditions associated with the grant and are then recognised in profit or loss as other income on a systematic basis over the useful life of the asset.

Grants that compensate the Group for expenses incurred are recognised in profit or loss as other income on a systematic basis in the same periods in which the expenses are recognised.

(j) **Income tax**

Income tax expense comprises current and deferred tax. Income tax expense is recognised in profit or loss except to the extent that it relates to a business combination or items recognised directly in equity or other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted by the end of the reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities in the statement of financial position and their tax bases.

Deferred tax is not recognised for the following temporary differences: the initial recognition of goodwill, the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit nor loss.

Deferred tax is measured at the tax rates that are expected to apply to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the end of the reporting period.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Deferred tax assets are reviewed at the end of each reporting period and are reduced to the extent that is no longer probable that the related tax benefit will be realised.

A tax incentive that is not a tax base of an asset is recognised as a reduction of tax expense in profit or loss as and when it is granted and claimed. Any unutilised portion of the tax incentive is recognised as a deferred tax asset to the extent that it is probable that future taxable profits will be available against which the unutilised tax incentive can be utilised.

(k) **Employee benefits**

Short term employee benefits

Short-term employee benefit obligations in respect of salaries, annual bonuses, paid annual leave and sick leave are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

The Company's contributions to statutory pension funds are charged to profit or loss in the year to which they relate. Once the contributions have been paid, the Company has no further payment obligations.

(l) **Foreign currency transaction**

Transactions in foreign currencies are translated to the respective functional currencies of the Group entities at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the end of the reporting period are translated to the functional currency at the exchange rate at the date.

Non-monetary assets and liabilities denominated in foreign currencies are not translated at the end of the reporting date, except for those that are measured at the fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined.

Foreign currency differences arising on retranslation are recognised in profit arising on the retranslation of available-for-sale equity instruments or a financial instrument designated as a hedge of currency risk, which are recognised in other comprehensive income.

The closing rate used in the translation is as follows:

JPY100 RM3.5645 (2014: JPY100 RM2.9255)

(b) **Financial risk management**

The Group and the Company have exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk

(c) **Credit risk**

Credit risk is the risk of a financial loss to the Group and the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The Group and the Company's exposure to credit risk arises principally from its receivables from customers and loans and advances to related companies.

(i) **Receivables**

Risk management objectives, policies and processes for managing the risk

Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. Normally, credit evaluations are performed on customers requiring credit over a certain amount.

Exposure to credit risk, credit quality and collateral

As at the end of the reporting period, the Group and the Company have only domestic receivables. The maximum exposure to credit risk arising from receivables is represented by the carrying amounts in the statement of financial position.

Management has taken reasonable steps to ensure that receivables that are neither past due nor impaired are stated at their realisable values. A significant portion of these receivables are regular customers that have been transacting with the Group and the Company. The Group and the Company use ageing analysis to monitor the credit quality of the receivables. Any receivables having significant balances past due more than 60 days, which are deemed to have higher credit risk, are monitored individually.

Impairment losses

The Group and the Company maintain an ageing analysis in respect of trade receivables only. The ageing of trade receivables as at the end of the reporting period was:

	Gross RM	Individual impairment RM	Net RM
2015			
Group and Company			
Past due 0-30 days	**1,163,000**	**-**	**1,163,000**
Past due 31-120 days	**4,955**	**-**	**4,955**
Past due more than 120 days	**383,730**	**(383,730)**	**-**
	1,551,685	**(383,730)**	**1,167,955**
2014			
Group and Company			
Past due 0-30 days	60,379	-	60,379
Past due 31-120 days	203,440	-	203,440
Past due more than 120 days	187,267	-	187,267
	451,086	-	451,086

The movements in the provision for impairment losses of trade receivables during the year were:

	Group and Company	
	2015	2014
	RM'000	RM'000
At 1 January	**-**	-
Impairment loss recognised	**383,730**	-
At 31 December	**383,730**	-

The allowance account in respect of trade receivables is used to record impairment losses. Unless the Group and the Company are satisfied that recovery of the amount is possible, the amount considered is irrecoverable is written off against the receivables directly.

(d) **Liquidity risk**

Liquidity risk is the risk that the Group and the Company will not be able to meet its financial obligations as they fall due. The Group and the Company exposure to liquidity risk arises principally from its various payables and loans.

The Group and the Company maintain a level of cash and cash equivalents deemed adequate by the management to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they fall due.

(e) **Fair value of financial instruments**

The carrying amounts of cash and cash equivalents, short term receivables and payables approximate fair values due to the relatively short term nature of these financial instruments.
